Anti-Slip Specialists

"Waterproofing represents around 1% of the total building costs. Water leaks and the subsequent damage account for around 80% of all building defects."
Paul Evans - President of the Australian Institute of Waterproofing

STAGE 3: First Coat - Waterproof Sealant

- Apply the first coat of LR DIY - Waterproof Sealant by brush, roller or spray machine over the entire box gutter.
- Use LR DIY - RapidCure Spray to instantly set the Waterproof Sealant in case of approaching rain or to speed the job up.
- Allow curing for 24 hours.

Products required:

- LR DIY - Waterproof Sealant
- LR DIY - RapidCure Spray
- Graco - Airless Spray Machine

STAGE 4: Second Coat - Waterproof Sealant

- Apply the second coat of LR DIY - Waterproof Sealant by brush, roller or spray machine over the entire box gutter and proceed to Stage 5.

STAGE 5: Broadcast Grit

- Broadcast the LR DIY - Grit evenly into the wet layer of LR DIY - Waterproof Sealant by hand for optimal adhesion.

- Use LR DIY - RapidCure Spray to instantly set the Waterproof Sealant in case of approaching rain or to speed the job up.
- Allow curing for 24 hours before applying the Tough Coat.

Products required:

- LR DIY - Grit
- LR DIY - RapidCure Spray

STAGE 6: Tough Coat

- Sweep or blow with a leaf blower any loose grit away before applying the Tough Coat.
- Mix the LR DIY - Tough Coat with the LR DIY - Tough Coat Hardener and apply 2-3 coats of the mixture to the entire box gutter.
- Allow curing for 12 hours in between coats.

Products required:

- LR DIY - Tough Coat
- LR DIY - Tough Coat Hardener
